Summer Work 2023

This workbook contains problems designed to ensure the student's readiness for Algebra 2. The ten topics covered in this packet are concepts that should be mastered before entering Algebra 2. Assistance with the packet will be provided at the beginning of the school year. Completion of this packet over the summer before beginning Algebra 2 will be of great value to helping students successfully meet the academic challenges awaiting them in Algebra 2 and beyond.

Topics Covered in this Packet:

1. Order of Operations
2. Fractions
3. Exponents
4. Radicals
5. Simplifying Expressions
6. Solving Equations
7. Solving Inequalities
8. Linear Graphs
9. Quadratics: Multiplying, Factoring and Solving Polynomial Expressions and Equations
10. Linear Functions

Instructions:

- Start review packet about 2 weeks prior to the start of the school year.
 - You are expected to use your notes from Algebra 1 and Geometry.
 - Show all work (when appropriate) on a separate sheet of paper
 - Simplification is implied for all problems.
 - Leave answers in fractional form when appropriate (improper fractions are preferred to mixed numbers).
 - Problems are to be returned on the first Friday of classes (after some class time for questions and answers has been provided). A test reviewing the prerequisite skills (reviewed in this packet) will be conducted the following week of classes.
 - If, upon examination of this work, you believe that you may need a different math course placement, please contact the school.
-

Remember: This packet is for your benefit and is intended to help you succeed as you move through more advanced math classes.
